

All 5 screenshots are listed below

The screenshot shows the PyCharm IDE interface. The top toolbar includes icons for file operations, search, and running code. The 'Project' view on the left shows the project structure with folders like '.venv', 'Lib', 'Scripts', and 'ignore'. The 'Run' view at the bottom displays the execution output for 'functions.py'. The code in the editor is as follows:

```
10     return celsius
11     radius = float(input("Enter radius: "))
12     area = circle_area(radius)
13     print(f"{area:.2f}")
14     money = float(input("Enter money: "))
15     tax = float(input("Enter tax rate as a decimal: "))
```

The Run console output is:

```
C:\Users\murph\PycharmProjects\FunctionsAssignment\.venv\Scripts\python.exe C:\Users\murph\PycharmProjects\FunctionsAssignment\functions.py
Enter radius: 10
314.16
Enter money: 20
Enter tax rate as a decimal: 0.06
21.20
Enter Fahrenheit temperature: 32
0.0
Process finished with exit code 0
```

The status bar at the bottom indicates the file encoding is UTF-8, 4 spaces, and Python 3.13.

This screenshot shows the same PyCharm IDE interface with different input values. The code in the editor is identical to the first screenshot:

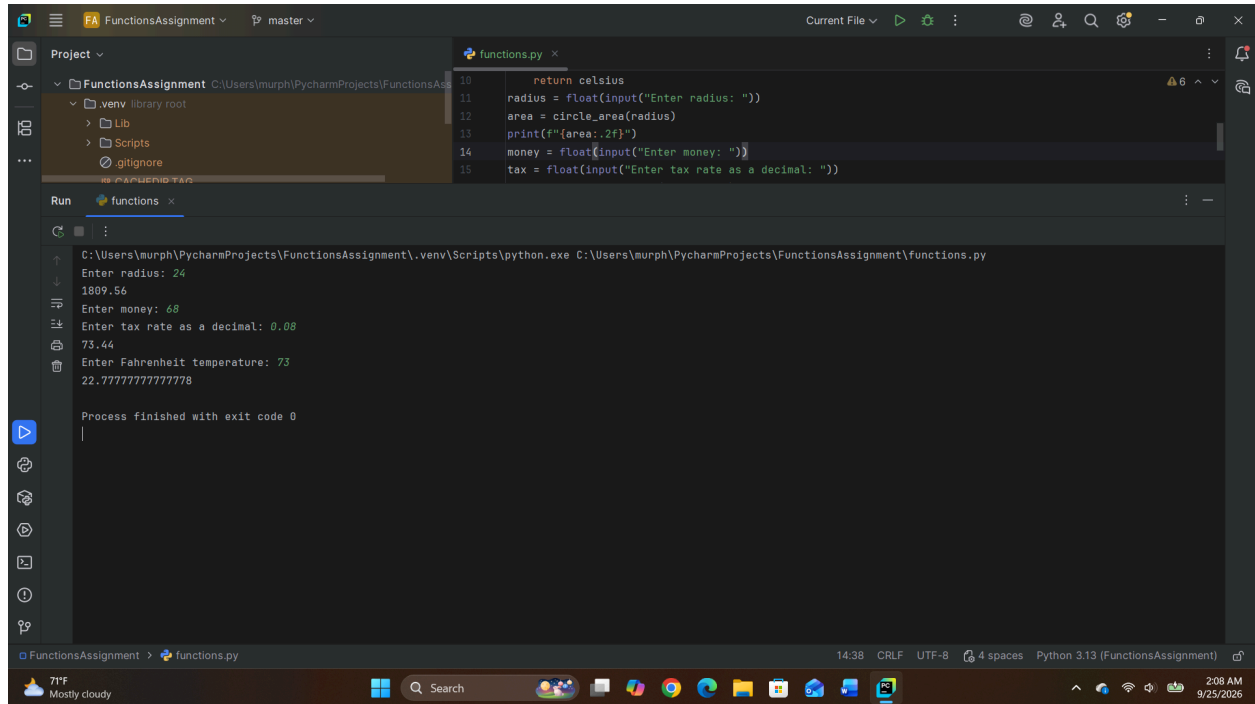

```
10     return celsius
11     radius = float(input("Enter radius: "))
12     area = circle_area(radius)
13     print(f"{area:.2f}")
14     money = float(input("Enter money: "))
15     tax = float(input("Enter tax rate as a decimal: "))
```

The Run console output is:

```
C:\Users\murph\PycharmProjects\FunctionsAssignment\.venv\Scripts\python.exe C:\Users\murph\PycharmProjects\FunctionsAssignment\functions.py
Enter radius: 6
113.10
Enter money: 54
Enter tax rate as a decimal: 0.04
56.16
Enter Fahrenheit temperature: 80
26.666666666666668
Process finished with exit code 0
```

The status bar at the bottom shows the same configuration as the first screenshot.

All 5 screenshots are listed below

The screenshot displays the PyCharm IDE interface. The top toolbar shows the 'Run' button (a green play icon). The left sidebar contains the 'Project' view, showing the file structure of the 'FunctionsAssignment' project, including a virtual environment (venv) and a 'Scripts' folder. The main editor window displays the 'functions.py' file with the following Python code:

```
10     return celsius
11     radius = float(input("Enter radius: "))
12     area = circle_area(radius)
13     print(f"{area:.2f}")
14     money = float(input("Enter money: "))
15     tax = float(input("Enter tax rate as a decimal: "))
```

Below the editor, the 'Run' console shows the execution output for the 'functions' configuration. The output indicates the script was executed using Python 3.13.13, and the process finished with exit code 0. The console text is as follows:

```
C:\Users\murph\PycharmProjects\FunctionsAssignment\.venv\Scripts\python.exe C:\Users\murph\PycharmProjects\FunctionsAssignment\functions.py
Enter radius: 24
1809.56
Enter money: 68
Enter tax rate as a decimal: 0.08
73.44
Enter Fahrenheit temperature: 73
22.77777777777778
Process finished with exit code 0
```

The bottom status bar of the IDE shows the current file is 'functions.py', the time is 14:38, and the encoding is UTF-8. The Windows taskbar at the very bottom shows the system clock as 2:08 AM on 9/25/2026, with a weather widget indicating 71°F and 'Mostly cloudy'.

All 5 screenshots are listed below

The screenshot shows the PyCharm IDE interface. The top toolbar includes icons for file operations, search, and running code. The 'Project' view on the left shows the project structure with folders like '.venv', 'Lib', 'Scripts', and 'functions.py'. The 'Run' console at the bottom displays the output of the program. The code in 'functions.py' includes a function to calculate the area of a circle and a function to convert Fahrenheit to Celsius.

```
10     return celsius
11     radius = float(input("Enter radius: "))
12     area = circle_area(radius)
13     print(f"{area:.2f}")
14     money = float(input("Enter money: "))
15     tax = float(input("Enter tax rate as a decimal: "))
```

Run console output:

```
C:\Users\murph\PycharmProjects\FunctionsAssignment\.venv\Scripts\python.exe C:\Users\murph\PycharmProjects\FunctionsAssignment\functions.py
Enter radius: 2
12.57
Enter money: 20
Enter tax rate as a decimal: 0.06
21.20
Enter Fahrenheit temperature: 42
5.555555555555555
Process finished with exit code 0
```

This screenshot shows the same PyCharm IDE interface as the first one, but with different input values for the program execution. The code in 'functions.py' is identical to the first screenshot.

```
10     return celsius
11     radius = float(input("Enter radius: "))
12     area = circle_area(radius)
13     print(f"{area:.2f}")
14     money = float(input("Enter money: "))
15     tax = float(input("Enter tax rate as a decimal: "))
```

Run console output:

```
C:\Users\murph\PycharmProjects\FunctionsAssignment\.venv\Scripts\python.exe C:\Users\murph\PycharmProjects\FunctionsAssignment\functions.py
Enter radius: 1
3.14
Enter money: 100000
Enter tax rate as a decimal: 0.06
106000.00
Enter Fahrenheit temperature: 320
160.0
Process finished with exit code 0
```
